**HEAVY FORGINGS**

**HOT NEWS**

**GN ROPE FITTINGS PRESENT WORLDS  
BIGGEST**

**FORGED SLING PROTECTOR SHACKLE**

## **WLL 2000 TON**

Up until today the biggest Sling Protector Shackle was WLL 1500 ton. As the market permanently requires bigger and heavier lifting equipment, GN Rope Fittings decided to develop the worlds biggest Sling Protector Shackle with a capacity of WLL 2000 ton.

This shackle is made from 100% forged alloy steel, quenched and tempered. The extended body width and rounded edges protect a sling from damage.

This Shackle has a Work Load Limit (WLL) of 2000 ton, and a safety factor of 4:1. The shackle pin has eye bolts at both ends which allow easy mounting and dismounting. A stainless steel Z-bar secures the nut.

The shackles are forged in our Nieuwkoop Holland factory in accordance with approved forging processes.

The first 4 pieces have been successfully manufactured and delivered to a Middle East client.
